3. The Company had no loan-backed securities with current year OTTI that resulted from the present value of projected cash flows expected to be collected being less than the amortized cost of the securities.
4. The following summarizes gross unrealized investment losses on loan-backed securities by the length of time that securities have continuously been in an unrealized loss position.
 - a. The aggregate amount of unrealized losses:

	<u>Less than 12 months</u>	<u>12 Months or More</u>
Residential mortgage-backed securities	\$ (402,776)	\$ —
Commercial mortgage-backed securities	(128,982)	—
Other loan backed and structured securities	(117,255)	—
Total	1. \$ <u>(649,013)</u>	2. \$ <u>—</u>

- b. The aggregate related fair value of securities with unrealized losses:

	<u>Less than 12 months</u>	<u>12 Months or More</u>
Residential mortgage-backed securities	\$ 20,931,791	\$ —
Commercial mortgage-backed securities	4,959,893	—
Other loan backed and structured securities	23,576,074	—
Total	1. \$ <u>49,467,758</u>	2. \$ <u>—</u>

5. All loan-backed securities in an unrealized loss position were reviewed to determine whether an other-than-temporary impairment should be recognized. For those securities in an unrealized loss position at September 30, 2018, the Company has not made a decision to sell any such securities and does not intend to sell such securities. The Company has evaluated its cash flow requirements and believes that its liquidity is adequate and it will not be required to sell these securities before recovery of their cost basis. This unrealized loss is primarily attributable to an increase in interest rates since acquisition, market illiquidity and volatility in the U.S. economy and not specific to individual issuer credit.

20. Fair Value

A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

1. Items Measured and Reported at Fair Value by Levels 1, 2 and 3

The Company has not recorded any securities at fair value as of September 30, 2018. In general, and if applicable, the Company categorizes its assets and liabilities that are reported on the balance sheet at fair value into the three-level hierarchy. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows.

- Level 1 – Quoted prices for identical instruments in active markets. The Company generally defines an active market as a market in which trading occurs at significant volumes. Active markets generally are more liquid and have a lower bid-ask spread than an inactive market.
- Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and observable inputs other than quoted prices, such as interest rates or yield curves and other inputs derived from or corroborated by observable market inputs.
- Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable. Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation. The Company has no assets and liabilities in this category.

An asset or liability’s categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation. Bonds are generally recorded at amortized cost. The following fair value hierarchy table presents information about the Company’s assets measured at fair value as of September 30, 2018.

Description for each class of asset or liability	Level 1	Level 2	Level 3	TOTAL
a. Assets at fair value				
Cash, cash equivalents and short-term investments	\$ —	\$ 33,758,387	\$ —	\$ 33,758,387
Total Assets at Fair Value	\$ —	\$ 33,758,387	\$ —	\$ 33,758,387

Cash and Short-Term Investments

The carrying amounts reported in the statement of admitted assets, liabilities and surplus for these instruments are at amortized cost. Money market mutual funds are accounted for at fair value, which approximates amortized cost.

Bonds

Bonds with an NAIC designation of 1 and 2 are carried at amortized cost while bonds with an NAIC designation of 3 through 6 are carried at the lower of cost or fair value. The Company had no bonds carried at fair value at September 30, 2018.

The fair value of bonds in the investment portfolio is generally based on prices received from third party pricing services or alternative pricing sources with reasonable levels of price transparency. The pricing services prepare estimates of fair value measurements using their pricing models, which include available relevant market information, benchmark curves, benchmarking of like securities, and sector groupings. Additional valuation factors that can be taken into account are nominal spreads and liquidity adjustments. The pricing services evaluate each asset class based on relevant market and credit information, perceived market movements and sector news. The market inputs used in the pricing evaluation include: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data and industry and economic events. Benchmark yields have in many cases taken priority over reported trades for securities that trade less frequently or those that are distressed trades, and therefore may not be indicative of the market. The extent of the use of each input is dependent on the asset class and the market conditions. Given the asset class, the priority of the use of inputs may change or some market inputs may not be relevant. Additionally, the valuation of fixed-maturity investments is more subjective when markets are less liquid due to the lack of market based inputs, which may increase the potential that the estimated fair value of an investment is not reflective of the price at which an actual transaction would occur.

2. Rollforward of Level 3 Items
Not Applicable

3. Policy on transfers into and out of Level 3
If applicable, transfers in and out of Level 3 are recognized at the end of the quarter when the Company evaluates whether securities with unobservable inputs need to be carried at fair value. There were no transfers between levels at September 30, 2018.

4. Inputs and Techniques Used for Level 3 Fair Values
Not Applicable

STATEMENT AS OF SEPTEMBER 30, 2018 OF MUNICIPAL ASSURANCE CORP.

5. Derivative Fair Values

The Company does not own derivatives at September 30, 2018.

B. Other Fair Value Disclosures

The fair value of the Company’s financial guaranty contracts accounted for as insurance was approximately \$210 million at September 30, 2018 and was based on management’s estimate of what a similarly rated financial guaranty insurance company would demand to acquire the Company’s in-force book of financial guaranty insurance business. This amount was based on a variety of factors that may include pricing assumptions management has observed for portfolio transfers, commutations, and acquisitions that have occurred in the financial guaranty market and included adjustments to the carrying value of unearned premium reserve for stressed losses and return on capital. The Company classified this fair value measurement as Level 3.

C. Fair Values for All Financial Instruments by Levels 1, 2 and 3

The table below reflects the fair values and admitted values of all admitted assets and liabilities that are financial instruments. The fair values are also categorized into the three-level fair value hierarchy as described in Note 20A.

Type of Financial Instrument	Fair Value	Admitted Value	Level 1	Level 2	Level 3	Not Practicable (Carrying Value)
