- B. Debt restructuring The Company has no investments in restructured debt in which the Company is a creditor at September 30, 2019.
- C. Reverse mortgages The Company did not hold reverse mortgages as investments at September 30, 2019.
- D. Loan-Backed Securities
  - 1. Prepayment assumptions for loan backed and structured securities were obtained from publicly available sources and internal models.
  - 2. The Company had no loan-backed securities with current year other-than-temporary impairments ("OTTI") due to either the intent to sell the securities or the inability or lack of intent to retain for the time sufficient to recover the amortized cost basis.
  - The Company had no loan-backed securities with current year OTTI that resulted from the present value of projected cash flows expected to be collected being less than the amortized cost of the securities.
  - 4. The following summarizes gross unrealized investment losses on loan-backed securities by the length of time that securities have continuously been in an unrealized loss position.
    - a. The aggregate amount of unrealized losses:

	Less th	Less than 12 months		onths or More
Residential mortgage-backed securities	\$		\$	
Other loan backed and structured securities		(28,753)		(75,014)
Total	1. \$	(28,753)	2. \$	(75,014)

b. The aggregate related fair value of securities with unrealized losses:

		Less than 12 months		12 Months or I		2 Months or More
Residential mortgage-backed securities		\$	_		\$	
Other loan backed and structured securities			5,304,060			12,705,191
Total	1.	\$	5,304,060	2.	\$	12,705,191

- 5. All loan-backed securities in an unrealized loss position were reviewed to determine whether an other-than-temporary impairment should be recognized. For those securities in an unrealized loss position at September 30, 2019, the Company has not made a decision to sell any such securities and does not intend to sell such securities. The Company has evaluated its cash flow requirements and believes that its liquidity is adequate and it will not be required to sell these securities before recovery of their cost basis. This unrealized loss is primarily attributable to an increase in interest rates since acquisition, market illiquidity and volatility in the U.S. economy and not specific to individual issuer credit.

The Company engaged in the following non-insurance transactions (generally representing greater than 0.5% of admitted assets) with affiliates:

1. The Company made dividend payments of \$105 million in the first nine months of 2019 to Municipal Assurance Holdings Inc. (the "Parent" or "MAC Holdings").

2. On October 1, 2019, Assured Guaranty US Holdings Inc. ("AGUS") and Assured Guaranty Ltd. ("AGL") completed the acquisition of all the outstanding equity interests in BlueMountain Capital Management, LLC ("BlueMountain") and its associated entities, for a purchase price of approximately \$160 million ("BlueMountain Acquisition"). As of the date of acquisition, BlueMountain managed \$18.3 billion in assets across CLOs and long-duration opportunity funds that build on its corporate credit, asset-backed finance and healthcare experience, as well as certain funds now subject to orderly wind-down. In addition, AGUS contributed \$60 million of cash to BlueMountain at closing and intends to contribute an additional \$30 million in cash within a year from closing. To fund the BlueMountain Acquisition and the related capital contributions, Assured Guaranty Municipal Corp. ("AGM"), Assured Guaranty Corp. ("AGC") and MAC made 10 year, 3.5% interest rate inter-company loans to AGUS totaling \$250 million (\$145 million from AGM, \$87.5 million from AGC and \$17.5 million from MAC).

In connection with the BlueMountain Acquisition, AGL, directly or indirectly through its subsidiaries, expects to invest \$500 million in BlueMountain-managed funds, CLOs and separately-managed accounts. In furtherance thereof, AGM, AGC and MAC, together, formed a new subsidiary, AG Asset Strategies LLC, which was capitalized with \$500 million of cash on October 18, 2019 (\$275 million from AGM, \$175 million from AGC and \$50 million from MAC).

- The Company paid dividends to its parent, MAC Holdings, of \$5 million on March 6, 2019 and \$100 million on June 13, 2019.
- 5. Under New York insurance law, MAC may only pay dividends out of "earned surplus", which is the portion of a company's surplus that represents the net earnings, gains or profits (after deduction of all losses) that have not been distributed to shareholders as dividends or transferred to stated capital or capital surplus, or applied to other purposes permitted by law, but does not include unrealized appreciation of assets. MAC may pay dividends without the prior approval of the New York Superintendent of Financial Services ("New York Superintendent") that, together with all dividends declared or distributed by it during the preceding 12 months, does not exceed the lesser of 10% of its policyholders' surplus (as of the last annual or quarterly statement filed with the New York Superintendent) or 100% of its adjusted net investment income during that period. In March 2019, MAC received approval from the New York Superintendent to dividend to MAC Holdings \$100 million in 2019, an amount that exceeded the dividend capacity that was available for distribution without regulatory approval. MAC distributed the \$100 million dividend to MAC Holdings in Second Quarter 2019. No further dividends are available for MAC to distribute in 2019 without approval from the New York Superintendent.

# 20. Fair Value

A. Inputs Used for Assets and Liabilities Measured and Reported at Fair Value

- 1. Items Measured and Reported at Fair Value by Levels 1, 2 and 3
  The Company has not recorded any securities at fair value as of September 30, 2019. In general, and if applicable, the Company categorizes its assets and liabilities that are reported on the balance sheet at fair value into the three-level hierarchy. The three-level fair value hierarchy is based on the degree of subjectivity inherent in the valuation method by which fair value was determined. The three levels are defined as follows:
  - Level 1 Quoted prices for identical instruments in active markets. The Company generally defines an active market as a market in which trading occurs at significant volumes. Active markets generally are more liquid and have a lower bid-ask spread than an inactive market.
  - Level 2 Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets
    that are not active; and observable inputs other than quoted prices, such as interest rates or yield curves and other inputs
    derived from or corroborated by observable market inputs.

Level 3 – Model derived valuations in which one or more significant inputs or significant value drivers are unobservable.
 Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation. The Company has no assets and liabilities in this category.

An asset or liability's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation. Bonds are generally recorded at amortized cost. The following fair value hierarchy table presents information about the Company's assets measured at fair value as of September 30, 2019.

Description for each class of asset or liability	Level	1	Level 2	Level 3	Net A	Asset Value	TOTAL
a. Assets at fair value							
Money market mutual funds	\$	— \$	57,590,790	\$	— \$	— \$	57,590,790
Total Assets at Fair Value	\$	— \$	57,590,790	\$	— \$	— \$	57,590,790

#### Bonds

Bonds with an NAIC designation of 1 and 2 are carried at amortized cost while bonds with an NAIC designation of 3 through 6 are carried at the lower of cost or fair value. The Company had no bonds carried at fair value at September 30, 2019.

The fair value of bonds in the investment portfolio is generally based on prices received from third-party pricing services or alternative pricing sources with reasonable levels of price transparency. The pricing services prepare estimates of fair value using their pricing models, which take into account: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, reference data, industry and economic events, and sector groupings. Additional valuation factors that can be taken into account are nominal spreads and liquidity adjustments. The pricing services evaluate each asset class based on relevant market and credit information, perceived market movements, and sector news.

Benchmark yields have in many cases taken priority over reported trades for securities that trade less frequently or those that are distressed trades, and therefore may not be indicative of the market. The extent of the use of each input is dependent on the asset class and the market conditions. The valuation of fixed-maturity investments is more subjective when markets are less liquid due to the lack of market based inputs.

#### Cash and Short-Term Investments

The carrying amounts reported in the statement of admitted assets, liabilities and surplus for these instruments are at amortized cost. Money market mutual funds are accounted for at fair value, which approximates amortized cost.

- 2. Rollforward of Level 3 Items Not Applicable
- 3. Policy on transfers into and out of Level 3
  If applicable, transfers in and out of Level 3 are recognized at the end of the quarter when the Company evaluates whether securities with unobservable inputs need to be carried at fair value. There were no transfers between levels at September 30, 2019.
- 4. Inputs and Techniques Used for Level 3 Fair Values Not Applicable
- Derivative Fair Values
   The Company does not own derivatives at September 30, 2019.
- B. Other Fair Value Disclosures

The fair value of the Company's financial guaranty contracts accounted for as insurance was approximately \$162 million at September 30, 2019 and was based on management's estimate of what a similarly rated financial guaranty insurance company would demand to acquire the Company's in-force book of financial guaranty insurance business. This amount was based on a variety of factors that may include pricing assumptions management has observed for portfolio transfers, commutations, and acquisitions that have occurred in the financial guaranty market and included adjustments to the carrying value of unearned premium reserve for stressed losses and return on capital. The Company classified this fair value measurement as Level 3.

C. Fair Values for All Financial Instruments by Levels 1, 2 and 3

The table below reflects the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method. The fair values are also categorized into the three-level fair value hierarchy as described in Note 20A.

Type of Financial Instrument	Fair Value	Admitted Value	Level 1	Level 2	Level 3	Net Asset Value	Not Practicable (Carrying Value)
