This financial supplement should be read in conjunction with documents filed by Assured Guaranty Ltd. (AGL and, together with its subsidiaries, Assured Guaranty or the Company) with the United States (U.S.) Securities and Exchange Commission, including its Annual Report on Form 10-K for the year ended December 31, 2024 and its Quarterly Reports on Form 10-Q for the quarterly periods ended March 31, 2025 and June 30, 2025.

Cautionary Statement Regarding Forward Looking Statements

Any forward looking statements made in this supplement reflect the current views of Assured Guaranty with respect to future events and financial performance and are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements involve risks and uncertainties that may cause actual results to differ materially from those set forth in these statements. Assured Guaranty's forward looking statements could be affected by many events. These events include: (i) significant changes in inflation, interest rates, the world's credit markets or segments thereof, credit spreads, foreign exchange rates, tariff regimes or general economic conditions, including the possibility of a recession or stagflation; (ii) geopolitical risk, terrorism and political violence risk, including those arising out of Russia's invasion of Ukraine and intentional or accidental escalation between The North Atlantic Treaty Organization and Russia, conflict in the Middle East, confrontation over Iran's nuclear program, the polarized political environment in the United States (U.S.), and strategic competition and tensions between the U.S. and China; (iii) cybersecurity risk and the impacts of artificial intelligence, machine learning and other technological advances, including potentially increasing the risks of malicious cyber attacks, dissemination of misinformation, and disruption of markets, including the markets in which the Company participates; (iv) the possibility of a U.S. government shutdown, payment defaults on the debt of the U.S. government or instruments issued, insured or guaranteed by related institutions, agencies or instrumentalities, and downgrades to their credit ratings; (v) developments in the world's financial and capital markets, including stresses in the financial condition of banking institutions in the U.S. and the possibility that increasing participation of unregulated financial institutions in these markets results in losses or lower valuations of assets, reduced liquidity and credit and/or contraction of these markets, that adversely affect repayment rates of insured obligors, Assured Guaranty's insurance loss or recovery experience, or investments of Assured Guaranty; (vi) reduction in the amount of available insurance opportunities and/or in the demand for Assured Guaranty's insurance; (vii) the possibility that budget or pension shortfalls, difficulties in obtaining additional financing, changes in applicable laws or regulations or other factors will result in credit losses or liquidity claims on obligations of state, territorial and local governments, their related authorities, public corporations and other obligors that Assured Guaranty insures or reinsures; (viii) insured losses, including losses with respect to related legal proceedings, in excess of those expected by Assured Guaranty or the failure of Assured Guaranty to realize loss recoveries that are assumed in its expected loss estimates for insurance exposures, including below-investment-grade (BIG) healthcare, United Kingdom (U.K.) regulated utility, European renewable energy, and Puerto Rico Electric Power Authority (PREPA) exposures; (ix) the impact of Assured Guaranty satisfying its obligations under insurance policies with respect to legacy insured Puerto Rico bonds; (x) the possibility that underwriting insurance in new jurisdictions and/or covering new sectors or classes of business does not result in the benefits anticipated or subjects Assured Guaranty to negative consequences; (xi) increased competition, including from new entrants into the financial guaranty industry, nonpayment insurance and other forms of capital saving or risk syndication available to banks and insurers; (xii) the possibility that investments made by Assured Guaranty for its investment portfolio, including alternative investments, do not result in the benefits anticipated or subject Assured Guaranty to reduced liquidity at a time it requires liquidity, or to other negative or unanticipated consequences; (xiii) the possibility that Assured Guaranty's mergers, acquisitions, divestitures and other strategic transactions, including the transactions with Sound Point Capital Management, LP (Sound Point, LP) and certain of its investment management affiliates (together with Sound Point, LP, Sound Point) and/or Assured Healthcare Partners LLC (AHP), do not result in the benefits anticipated and/or subject Assured Guaranty to negative consequences; (xiv) the inability to control the business, management or policies of entities in which Assured Guaranty holds a minority interest; (xv) the impact of market volatility on the fair value of Assured Guaranty's assets and liabilities subject to mark-to-market, including certain of its investments, contracts accounted for as derivatives, its committed capital securities (CCS), and its consolidated variable interest entities (VIEs); (xvi) rating agency action, including a ratings downgrade, a change in outlook, the placement of ratings on watch for downgrade, or a change in rating criteria, at any time, of AGL or any of its insurance subsidiaries, and/or of any securities AGL or any of its subsidiaries have issued, and/or of transactions that AGL's insurance subsidiaries have insured; (xvii) the inability of Assured Guaranty to access external sources of capital on acceptable terms; (xviii) noncompliance with, and/or changes in, applicable laws or regulations, including insurance, bankruptcy and tax laws, tariffs, or other governmental actions; (xix) the possibility that legal or regulatory decisions or determinations subject Assured Guaranty or obligations that it insures or reinsures to negative consequences; (xx) difficulties or delays with the execution of Assured Guaranty's business strategy; (xxi) loss of key personnel; (xxii) changes in applicable accounting policies or practices; (xxiii) public health crises, including pandemics and endemics, and the governmental and private actions taken in response to such events; (xxiv) natural or man-made catastrophes; (xxv) the impact of climate change on Assured Guaranty's business and regulatory actions taken related to such risk; (xxvi) other risk factors identified in AGL's filings with the U.S. Securities and Exchange Commission (SEC); (xxvii) other risks and uncertainties that have not been identified at this time; and (xxviii) management's response to these factors. Assured Guaranty undertakes no obligation to update publicly or review any forward looking statement, whether as a result of new information, future developments or otherwise, except as required by law.

Adjusted operating income ⁽⁵⁾ effect	3	2	39	32
Adjusted operating income per diluted share ⁽⁵⁾	0.07	0.04	0.78	0.57

1) Accounting principles generally accepted in the United States of America (GAAP).

2) Please refer to the explanation of Non-GAAP Financial Measures set forth at the end of this Financial Supplement.

3) Represents the ratio of adjusted operating provision for income taxes to adjusted operating income before income taxes.

4) Quarterly ROE calculations represent annualized returns. See page 6 for additional information on calculation.

5) Condensed consolidated statement of operations items mentioned in this Financial Supplement that are described as operating (i.e., operating net earned premiums and credit derivative revenues) are non-GAAP measures and represent components of adjusted operating income. Please refer to the explanation of Non-GAAP Financial Measures set forth at the end of this Financial Supplement.

6) Represents the effect of consolidating financial guaranty variable interest entities (FG VIEs) and consolidated investment vehicles (CIVs) (FG VIE and CIV consolidation).

Total fixed maturity securities, available-for-sale	\$ 6,498	100.0 %

Duration of available-for-sale fixed maturity securities and short-term investments (in years):

4.1

1) Represents annualized investment income based on amortized cost and pre-tax book yields.

2) Includes fair value of \$130 million in subprime RMBS, of which 92% were rated BIG.

3) Includes securities purchased or obtained as part of loss mitigation or other risk management strategies.

4) Cash is not included in the yield calculation.

5) Ratings generally reflect the lower of Moody's Investors Service, Inc. or Standard & Poor's Financial Services LLC classifications except for purchased securities that the Company has insured, and for which it had expected losses to be paid (Loss Mitigation Securities) and certain other securities, which use internal ratings classifications. Loss Mitigation Securities and other securities total \$814 million in par with carrying value of \$596 million and are primarily included in the BIG category.

6) Primarily includes contingent value instruments received in connection with the 2022 resolution of the Company's exposure to insured Puerto Rico credits experiencing payment default other than PREPA. These securities are not rated.

7) Primarily includes CLO equity tranches.

Net exposure to qualified statutory capital	42:1	94:1		48:1
Capital ratio ⁽⁶⁾	68:1	142:1		76:1
Financial resources ratio ⁽⁷⁾	39:1	62:1		42:1
Statutory net exposure to claims-paying resources	24:1	41:1		27:1
Separate company statutory basis:				
Admitted assets	\$ 7,200	\$ 1,493		
Total liabilities	3,686	760		
Loss and LAE reserves (recoverable)	(78)	52		
Paid in capital stock	447	826		

1) Assured Guaranty Re Ltd. (AG Re) numbers represent the Company's estimate of AG Re on a U.S. statutory-basis, except for contingency reserves.

2) Eliminations consist of intercompany deferred ceding commissions. Net exposure and net debt service outstanding eliminations relate to second-to-pay policies under which an Assured Guaranty insurance subsidiary guarantees an obligation already insured by another Assured Guaranty insurance subsidiary.

3) The numbers shown for AG have been adjusted to include its U.K. and French insurance subsidiaries.

4) Loss and LAE reserves exclude adjustments to claims-paying resources for AG because the balance was in a net recoverable position of \$66 million.

5) Net exposure and net debt service outstanding are presented on a statutory basis. Includes \$4,274 million of specialty business.

6) The capital ratio is calculated by dividing net debt service outstanding by qualified statutory capital.

7) The financial resources ratio is calculated by dividing net debt service outstanding by total claims-paying resources.

Please refer to the Glossary for an explanation of changes in the presentation of net debt service and net par outstanding.

Net deferred premium revenue:		
Financial guaranty	\$ 3,669	\$ 27
Specialty	5	—
Net deferred premium revenue	3,674	27
Contra-paid	(23)	(4)
Net unearned premium reserve	\$ 3,651	\$ 23

1) Represents the future expected amortization of current debt service outstanding (principal and interest), assuming no advance refundings, as of June 30, 2025. Actual amortization differs from expected maturities because borrowers may have the right to call or prepay guaranteed obligations, terminations and because of management's assumptions on structured finance amortization.

2) See also page 26, for "Net Expected Loss to be Expensed."

3) Represents expected future premiums on insured credit derivatives.

4) Unearned premium reserve represents deferred premium revenue less claim payments made (net of recoveries received) that have been recognized in the statement of operations (contra-paid).

Total BIG Category 3	1,404	1,374
BIG Total	\$ 10,508	\$ 10,182

- 1) The Company assigns each BIG exposure to one of the three BIG surveillance categories below, which generally represent the following: BIG 1: Below-investment-grade exposures for which there are possible future losses, on a present value basis, and the aggregate probability weighting of scenarios with future losses is less than 50%, regardless of whether the Company has or has not paid a claim for which it expects to be reimbursed within one year (liquidity claim). BIG 2: Below-investment-grade exposures for which there are possible future losses, on a present value basis, and the aggregate probability weighting of scenarios with future losses is 50% or more, but for which no claims (other than liquidity claims) have yet been paid. BIG 3: Below-investment-grade exposures for which future losses are expected, on a present value basis, and the aggregate probability weighting of scenarios with future losses is 50% or more, and for which claims, other than liquidity claims have been paid.

For purposes of classifying BIG exposures into one of the three BIG categories, the Company calculates the present value of projected claim payments and recoveries using the pre-tax book yield of the investment portfolio as the applicable discount rate.

For financial statement measurement purposes, the Company uses risk-free rates (as determined each quarter) for discounting, rather than pre-tax book yield of the investment portfolio, to calculate the expected losses to be paid. Expected losses to be paid (recovered) are based on probability weighted scenarios and serve as the basis for the loss reserves reported in accordance with U.S. GAAP.

Please refer to the Glossary for an explanation of the Company's internal rating approach, presentation of net par outstanding and a description of various sectors.

Glossary

Financial Guaranty Insurance

Net Par Outstanding and Internal Ratings

Net Par Outstanding is insured par exposure, net of reinsurance cessions. Unless otherwise indicated, GAAP net par outstanding amounts exclude amounts as a result of loss mitigation strategies, including securities the Company has purchased for loss mitigation purposes that are held in the investment portfolio.

Internal Rating utilizes the Company's ratings scale, which is similar to that used by the nationally recognized statistical rating organizations; however, the ratings in the tables may not be the same as ratings assigned by any such rating agency.

Statutory Net Par and Net Debt Service Outstanding. Under statutory accounting, net par and net debt service outstanding would be reduced both when an outstanding issue is legally defeased (i.e., an issuer has legally discharged its obligations with respect to a municipal security by satisfying conditions set forth in defeasance provisions contained in transaction documents and is no longer responsible for the payment of debt service with respect to such obligations) and when such issue is economically defeased (i.e., transaction documents for a municipal security do not contain defeasance provisions but the issuer establishes an escrow account with U.S. government securities in amounts sufficient to pay the refunded bonds when due; the refunded bonds are not considered paid and continue to be outstanding under the transaction documents and the issuer remains responsible to pay debt service when due to the extent monies on deposit in the escrow account are insufficient for such purpose).

Performance Indicators

The performance information described below is obtained from third parties and/or provided by the trustee and may be subject to revision as updated or additional information is obtained:

60+ Day Delinquencies are defined as loans that are greater than 60 days delinquent and all loans that are in foreclosure, bankruptcy or real estate owned divided by current collateral balance.

Average Credit Enhancement is intended to provide a measure of the amount of equity and/or subordinated tranches that are junior in the capital structure to Assured Guaranty's exposure, expressed as a percentage of the total transaction size, and reflects any reduction of that credit support resulting from defaults or other factors. For transactions where excess spread may be available to absorb certain losses, the amounts shown do not include any benefit from excess spread. The calculation methodologies differ for the various asset classes to reflect differences in transaction structures in order to provide a measure that management believes is comparable across asset classes. Some asset classes may not have subordinated tranches so they are excluded from the weighted averages.

Sectors

Below are brief descriptions of selected types of public and structured finance obligations that the Company insures and reinsures. For a more complete description, please refer to Assured Guaranty Ltd.'s Annual Report on Form 10-K for the year ended December 31, 2024.

U.S. Public Finance:

General Obligation Bonds are full faith and credit obligations that are issued by states, their political subdivisions and other municipal issuers, and are supported by the general obligation of the issuer to pay from available funds and by a pledge of the issuer to levy property taxes in an amount sufficient to provide for the full payment of the bonds.

Tax-Backed Bonds are obligations that are supported by the issuer from specific and discrete sources of taxation and tax-backed revenue bonds. Tax-backed obligations may be secured by a lien on specific pledged tax revenues, such as a gasoline or excise tax, or an income tax, or incrementally from growth in property tax revenue associated with growth in property values. These obligations also include obligations secured by special assessments levied against property owners and often benefit from issuer covenants to enforce collections of such assessments and to foreclose on delinquent properties. Lease revenue bonds typically are general fund obligations of a municipality or other governmental authority that are subject to annual appropriation or abatement; projects financed and subject to such lease payments ordinarily include real estate or equipment serving an essential public purpose.

Municipal Utility Bonds are obligations of all forms of municipal utilities, including electric, water and sewer utilities and resource recovery revenue bonds. These utilities may be organized in various forms, including municipal enterprise systems, authorities or joint action agencies.

Transportation Bonds include a wide variety of revenue-supported obligations, such as bonds for airports, ports, tunnels, municipal parking facilities, toll roads and toll bridges.

Healthcare Bonds are obligations of healthcare facilities, including community-based hospitals and systems, as well as of health maintenance organizations and long-term care facilities.

Infrastructure Bonds include obligations issued by a variety of entities engaged in the financing of infrastructure projects, such as roads, airports, ports, social infrastructure and other physical assets delivering essential services supported by long-term concession arrangements with a public sector entity.

Glossary (continued)

Sectors (continued)

Higher Education Bonds are obligations secured by revenue collected by either public or private secondary schools, colleges and universities. Such revenue can encompass all of an institution's revenue, including tuition and fees, or in other cases, can be specifically restricted to certain auxiliary sources of revenue or revenue relating to student accommodation.

Housing Revenue Bonds are obligations relating to both single and multi-family housing, issued by states and localities, supported by cash flow and, in some cases, insurance from entities such as the Federal Housing Administration.

Renewable Energy Bonds are obligations backed by revenue from renewable energy sources.

Other Public Finance Bonds include other debt issued, guaranteed or otherwise supported by U.S. national or local governmental authorities, as well as student loans, revenue bonds, and obligations of some not-for-profit organizations.

Non-U.S. Public Finance:

Regulated Utility Obligations are obligations issued by government-regulated providers of essential services and commodities, including electric, water and gas utilities, supported by the rates and charges paid by the utilities' customers. The majority of the Company's non-U.S. regulated utility business is conducted in the U.K.

Infrastructure Finance Obligations are obligations issued by a variety of entities engaged in the financing of non-U.S. infrastructure projects, such as roads, airports, ports, social infrastructure, student accommodations, stadiums, and other physical assets delivering essential services supported either by long-term concession arrangements or a regulatory regime. The majority of the Company's non-U.S. infrastructure business is conducted in the U.K.

Sovereign and Sub-Sovereign Obligations primarily includes obligations of local, municipal, regional or national governmental authorities or agencies outside of the U.S.

Renewable Energy Bonds are obligations secured by revenues relating to renewable energy sources, typically solar or wind farms. These transactions often benefit from regulatory support in the form of regulated minimum prices for the electricity produced. The majority of the Company's non-U.S. renewable energy business is conducted in Spain.

Pooled Infrastructure Obligations are synthetic asset-backed obligations that take the form of credit default swap obligations or credit-linked notes that reference either infrastructure finance obligations or a pool of such obligations, with a defined deductible to cover credit risks associated with the referenced obligations. The Company has not entered into a pooled infrastructure transaction since 2006.

Structured Finance:

Insurance Reserve Financings and Securitizations are transactions, including life insurance transactions, where obligations are secured by the future earnings from pools of various types of insurance/reinsurance policies and income produced by invested assets.

Residential Mortgage Backed Securities are obligations backed by first and second lien mortgage loans on residential properties. The credit quality of borrowers covers a broad range, including "prime," "subprime" and "Alt-A." A prime borrower is generally defined as one with strong risk characteristics as measured by factors such as payment history, credit score, and debt-to-income ratio. A subprime borrower is a borrower with higher risk characteristics. An Alt-A borrower is generally defined as a prime quality borrower that lacks certain ancillary characteristics, such as fully documented income. RMBS include home equity lines of credit, which refers to a type of residential mortgage-backed transaction backed by second-lien loan collateral. The Company has not provided insurance for RMBS in the primary market since 2008.

Subscription Finance Facilities are lending facilities provided to closed-end private market funds, most frequently private-equity funds. The facilities are secured by the uncalled capital commitments of the limited partners (LP) to the fund. The Company may guarantee new or existing facilities and on a single facility or portfolio basis. Assured Guaranty's exposures are generally to facilities with characteristics that include a high-quality fund sponsor with strong historical performance, a diverse LP base composed primarily of institutional LPs and experienced bank lenders.

Pooled Corporate Obligations are securities primarily backed by various types of corporate debt obligations, such as secured or unsecured bonds, bank loans or loan participations and trust preferred securities. These securities are often issued in "tranches," with subordinated tranches providing credit support to the more senior tranches. The Company's financial guaranty exposures generally are to the more senior tranches of these issues.

Financial Products Business is the guarantee of certain business written by financial products companies owned by Dexia SA, which comprised guaranteed investment contracts, medium term notes and equity payment undertaking agreements associated with leveraged lease business. This business is being run off with the final maturity due in 2031. Assured Guaranty is indemnified by Dexia SA and certain of its affiliates against loss from the former financial products business.

Glossary (continued)

Sectors (continued)

Other Structured Finance Obligations are obligations backed by assets not generally described in any of the other U.S. and Non-U.S. Structured Finance Obligations categories above.

Specialty Business

The Company also guarantees specialty business with similar risk profiles to its structured finance exposures written in financial guaranty form. Specialty business includes, for example, diversified real estate, insurance reserve financings and securitizations, pooled corporate obligations and aircraft residual value insurance transactions.

Non-GAAP Financial Measures

The Company discloses both: (i) financial measures determined in accordance with GAAP; and (ii) financial measures not determined in accordance with GAAP (non-GAAP financial measures). Financial measures identified as non-GAAP should not be considered substitutes for GAAP financial measures. The primary limitation of non-GAAP financial measures is the potential lack of comparability to financial measures of other companies, whose definitions of non-GAAP financial measures may differ from those of the Company.

The Company believes its presentation of non-GAAP financial measures provides information that is necessary for analysts to calculate their estimates of Assured Guaranty's financial results in their research reports on Assured Guaranty and for investors, analysts and the financial news media to evaluate Assured Guaranty's financial results.

GAAP requires the Company to consolidate entities where it is deemed to be the primary beneficiary which include FG VIEs, which the Company does not own and where its exposure is limited to its obligation under the financial guaranty insurance contract, and CIVs in which certain subsidiaries invest.

The Company discloses the effect of FG VIE and CIV consolidation that is embedded in each non-GAAP financial measure, as applicable. The Company believes this information may also be useful to analysts and investors evaluating Assured Guaranty's financial results. In the case of both the consolidated FG VIEs and the CIVs, the economic effect on the Company of each of the consolidated FG VIEs and CIVs is reflected primarily in the results of the Insurance segment.

The Company's management and AGL's Board of Directors use non-GAAP financial measures further adjusted to remove the effect of FG VIE and CIV consolidation (which the Company refers to as its core financial measures), as well as GAAP financial measures and other factors, to evaluate the Company's results of operations, financial condition and progress towards long-term goals. The Company uses core financial measures in its decision-making process for and in its calculation of certain components of management compensation. The financial measures that the Company uses to help determine compensation are: (i) adjusted operating income per share, further adjusted to remove the effect of FG VIE and CIV consolidation (core operating income per share); (ii) adjusted operating shareholders' equity per share, further adjusted to remove the effect of FG VIE and CIV consolidation (core operating shareholders' equity per share); (iii) ABV per share, further adjusted to remove the effect of FG VIE and CIV consolidation (core ABV per share); (iv) core operating return on equity, which is calculated as core operating income divided by the average of core operating shareholders' equity at the beginning and end of the period; and (v) PVP.

The Company's management believes that many investors, analysts and financial news reporters use adjusted operating shareholders' equity and/or ABV, each further adjusted to remove the effect of FG VIE and CIV consolidation, as the principal financial measures for valuing AGL's current share price or projected share price and also as the basis of their decision to recommend, buy or sell AGL's common shares.

Adjusted operating income, further adjusted for the effect of FG VIE and CIV consolidation, enables investors and analysts to evaluate the Company's financial results in comparison with the consensus analyst estimates distributed publicly by financial databases.

The following paragraphs define each non-GAAP financial measure disclosed by the Company and describe why it is useful. To the extent there is a directly comparable GAAP financial measure, a reconciliation of the non-GAAP financial measure and the most directly comparable GAAP financial measure is presented within this financial supplement.

Adjusted Operating Income: The Company's management believes that adjusted operating income is a useful measure because it clarifies the understanding of the operating results of the Company. Adjusted operating income is defined as net income (loss) attributable to AGL, as reported under GAAP, adjusted for the following:

- 1) Elimination of realized gains (losses) on the Company's investments that are recognized in net income (loss) attributable to AGL, except for gains and losses on securities classified as trading. The timing of realized gains and losses, which depends largely on market credit cycles, can vary considerably across periods. The timing of sales is largely subject to the Company's discretion and influenced by market opportunities, as well as the Company's tax and capital profile.
- 2) Elimination of non-credit impairment-related unrealized fair value gains (losses) on credit derivatives that are recognized in net income (loss) attributable to AGL, which is the amount of fair value gains (losses) in excess of the present value of the expected estimated economic credit losses. Such fair value adjustments are heavily affected by, and in part fluctuate with, changes in market interest rates, the Company's credit spreads, and other market factors and are not expected to result in an economic gain or loss.
- 3) Elimination of fair value gains (losses) on the Company's CCS that are recognized in net income (loss) attributable to AGL. Such amounts are affected by changes in market interest rates, the Company's credit spreads, price indications on the Company's publicly traded debt and other market factors and are not expected to result in an economic gain or loss.
- 4) Elimination of foreign exchange gains (losses) on remeasurement of net premium receivables and loss and LAE reserves that are recognized in net income (loss) attributable to AGL. Long-dated receivables and loss and LAE reserves represent the present value of future contractual or expected cash flows. Therefore, the current period's foreign exchange remeasurement gains (losses) are not necessarily indicative of the total foreign exchange gains (losses) that the Company will ultimately recognize.

Non-GAAP Financial Measures (continued)

5) The tax effects related to the above adjustments, which are determined by applying the statutory tax rate in each of the jurisdictions that generate these adjustments.

Adjusted operating income per share is calculated by dividing adjusted operating income by the weighted average diluted shares. The method for calculating weighted average diluted shares is in accordance with GAAP.

Adjusted Operating Shareholders' Equity and ABV: The Company's management believes that adjusted operating shareholders' equity is a useful measure because it excludes the fair value adjustments on investments, credit derivatives and CCS that are not expected to result in economic gain or loss. The Company's management uses ABV, further adjusted to remove the effect of FG VIE and CIV consolidation, to measure the intrinsic value of the Company, excluding franchise value. The Company's management believes that ABV is a useful measure because it enables an evaluation of the Company's in-force premiums and revenues net of expected losses.

Adjusted operating shareholders' equity per share and ABV per share, each further adjusted for FG VIE and CIV consolidation (core operating shareholders' equity per share and core ABV per share, respectively), are two of the key financial measures used in determining the amount of certain long-term compensation elements to management and employees and used by rating agencies and investors.

Adjusted operating shareholders' equity is defined as shareholders' equity attributable to AGL, as reported under GAAP, adjusted for the following:

- 1) Elimination of non-credit impairment-related unrealized fair value gains (losses) on credit derivatives that are reported on the consolidated balance sheet, which is the amount of unrealized fair value gains (losses) in excess of the present value of the expected estimated economic credit losses. Such fair value adjustments are heavily affected by, and in part fluctuate with, changes in market interest rates, credit spreads and other market factors and are not expected to result in an economic gain or loss.
- 2) Elimination of fair value gains (losses) on the Company's CCS that are reported on the consolidated balance sheet. Such amounts are affected by changes in market interest rates, the Company's credit spreads, price indications on the Company's publicly traded debt and other market factors and are not expected to result in an economic gain or loss.
- 3) Elimination of unrealized gains (losses) on the Company's investments that are recorded as a component of accumulated other comprehensive income (AOCI). The AOCI component of the fair value adjustment on the investment portfolio is not deemed economic because the Company generally holds these investments to maturity and therefore would not result in an economic gain or loss.
- 4) The tax effects related to the above adjustments, which are determined by applying the statutory tax rate in each of the jurisdictions that generate these adjustments.

ABV is adjusted operating shareholders' equity, as defined above, further adjusted for the following:

- 1) Elimination of deferred acquisition costs, net. These amounts represent net deferred expenses that have already been paid or accrued and will be expensed in future accounting periods.
- 2) Addition of the net present value of estimated net future revenue. See below.
- 3) Addition of the deferred premium revenue on financial guaranty contracts in excess of expected loss to be expensed, net of reinsurance. This amount represents the present value of the expected future net earned premiums, net of the present value of expected losses to be expensed.
- 4) The tax effects related to the above adjustments, which are determined by applying the statutory tax rate in each of the jurisdictions that generate these adjustments.

Shares outstanding as of the end of the reporting period are used to calculate adjusted operating shareholders' equity per share and ABV per share.

The unearned premiums and revenues included in ABV will be earned in future periods, but actual earnings may differ materially from the estimated amounts used in determining current ABV due to changes in foreign exchange rates, prepayment speeds, terminations, credit defaults and other factors.

Non-GAAP Financial Measures (continued)

Adjusted Operating ROE: Adjusted Operating ROE represents adjusted operating income for a specified period divided by the average of adjusted operating shareholders' equity at the beginning and the end of that period. Management believes that adjusted operating ROE is a useful measure to evaluate the Company's return on invested capital. Many investors, analysts and members of the financial news media use adjusted operating ROE, adjusted for VIE consolidation, to evaluate AGL's share price and as the basis of their decision to recommend, buy or sell the AGL common shares. Quarterly and year-to-date adjusted operating ROE are calculated on an annualized basis. Adjusted operating ROE, adjusted for VIE consolidation, is one of the key management financial measures used in determining the amount of certain long-term compensation to management and employees and used by rating agencies and investors.

Net Present Value of Estimated Net Future Revenue: The Company's management believes that this amount is a useful measure because it enables an evaluation of the present value of estimated net future revenue for non-financial guaranty insurance contracts. This amount represents the net present value of estimated future revenue from these contracts (other than credit derivatives with net expected losses), net of reinsurance, ceding commissions and premium taxes.

Future installment premiums are discounted at the approximate average pre-tax book yield of fixed-maturity securities purchased during the prior calendar year, other than Loss Mitigation Securities. The discount rate is recalculated annually and updated as necessary. Net present value of estimated future revenue for an obligation may change from period to period due to a change in the discount rate or due to a change in estimated net future revenue for the obligation, which may change due to changes in foreign exchange rates, prepayment speeds, terminations, credit defaults or other factors that affect par outstanding or the ultimate maturity of an obligation. There is no corresponding GAAP financial measure.

PVP or Present Value of New Business Production: The Company's management believes that PVP is a useful measure because it enables the evaluation of the value of new business production in the Insurance segment by taking into account the value of estimated future installment premiums on all new contracts underwritten in a reporting period as well as additional installment premiums and fees on existing contracts (which may result from supplements or fees or from the issuer not calling an insured obligation the Company projected would be called), regardless of form, which management believes GAAP GWP and changes in fair value of credit derivatives do not adequately measure. PVP in respect of contracts written in a specified period is defined as gross upfront and installment premiums received and the present value of gross estimated future installment premiums.

Future installment premiums are discounted at the approximate average pre-tax book yield of fixed-maturity securities purchased during the prior calendar year, other than certain fixed-maturity securities such as Loss Mitigation Securities. The discount rate is recalculated annually and updated as necessary. Under GAAP, financial guaranty installment premiums are discounted at a risk-free rate. Additionally, under GAAP, management records future installment premiums on financial guaranty insurance contracts covering non-homogeneous pools of assets based on the contractual term of the transaction, whereas for PVP purposes, management records an estimate of the future installment premiums the Company expects to receive, which may be based upon a shorter period of time than the contractual term of the transaction.

Actual installment premiums may differ from those estimated in the Company's PVP calculation due to factors including, but not limited to, changes in foreign exchange rates, prepayment speeds, terminations, credit defaults or other factors that affect par outstanding or the ultimate maturity of an obligation.
